ChEE 455/555
Homework Assignment
Assigned 2/15/02
Due 2/22/02

Assignment:

There are two topics I'd like you to discuss your opinion on in a short 1 page statement:

1) What are some of the difficulties involved with achieving "clean processing" and green chemistry goals from an industrial perspective?

2) Discuss the time scales of regulatory environmental policy changes and the difficulties companies have in meeting those timelines. Do you feel companies actually pursue environmental compliance goals in their research efforts in a timely manner?

Assessment:

This assignment will be assessed on correct grammatical usage to state and concisely support you opinions on two issues related to this class. You should focus on creating a short and complete statement that reflects your opinion. You will not be assessed on what your opinion actually is.

Summary of Evaluation Criteria:

1) format
2) grammar
3) conciseness
