

**Chemical Engineering 201**  
**Fall 2002**  
**Visual Basic Online References for Additional VB Help**

The following links are ones that I have looked at to help me when I'm writing VB code. Some are specifically about how to implement VB with Excel or other Microsoft tools and may be more useful. This information is to help you when you are looking for faster ways to program or are looking for functions that are built into VB.

<http://www.excel-vba-access.com/>  
*general help*

<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/office97/html/web/fulltoc.asp>  
*some about programming*

<http://msdn.microsoft.com/library/default.asp?url=/library/en-us/office97/html/output/F1/D6/S5B1DB.asp>  
*great list of functions available in VB!*

<http://www.iact.ie/courses/course32.html>  
*good general list of programming basics in VB.*

Your excel program may also have the extensive help files installed so you can look under the help icon on VB.
