Learning Journal Exercise #6:

It is often good to review what your strengths and weaknesses are so that you can find activities to help you succeed.

Describe what your two greatest strengths are as you prepare for a career in engineering. How will these two strengths aid you in your pursuit?

Describe your two greatest weaknesses that will impact how well you are able to prepare for your career. How could these weaknesses prevent you from reaching your goals? Find three activities you could begin doing next semester that would help strengthen your weak areas and describe what those activities are.
