What is your Learning Style?

For an upcoming discussion, we are going to need to know where you fit in the Myers-Briggs scale. This is a scale for measuring the personality type of learners and educators so they can see where their strengths and weaknesses lie. There is a test on-line that you can take that will tell you what you are.

Go to <http://www.ncsu.edu/felder-public/ILSpage.html>

Go to *ILS questionnaire--Web version*. and take the test there. Record your score that it gives after you answer the questions. As an example, my score was Ref 5, Sen 5, Vis 5, and Seq 1.

We will discuss what these scores mean on 9-18-06.
