

ABC.... XYZ list of Scientists

Pick one science for each letter of the alphabet. Locate it in the dictionary. Record a word or 2 that describes what they study.

- A astronomy, archaeology, aerodynamics _____
- B botany, biology, biochemistry, bacteriology _____
- C chemistry, climatology, cardiology _____
- D dendrochronology _____
- E ecology, entomology, embryology _____
- F futurology _____
- G geology, geography, genetics, gerontology _____
- H hematology, hydrogeology , hydrography _____
- I ichthyology _____
- J _____
- K kinesiology, kinetics _____
- L limnobiology , limnology _____
- M mineralogy, medicine, marine biology, molecular biology, morphology _____
- N nuclear physics, nutrition, neurology _____
- O ophthalmology, optics, oncology, oceanography _____
- P paleontology, physical chemistry, physiology, pathology, _____
physics (light, sound, magnetism, gravity, force, energy, electricity)
- Q _____
- R radiology _____
- S seismology, space science, speleology _____
- T taxonomy, thermodynamics, tectonics _____
- U uranography, urbanology _____
- V vulcanology, virology _____
- W _____
- X xylology _____
- Y _____
- Z zenography , zoophytology, zoology _____
